Yes, I concur with Ed Bailey's response.

Subject: Fwd: Yucca Mt.

Yesterday, I spoke with Bo Bodvarssons from the Lawrence Berkeley National Lab yesterday about their hydrogeologic models and studies on Yucca Mountain. He mentioned that LBNL is responsible for analyzing and modeling unsaturated flow and transport and also thermally driven coupled processes.

He offered to come to Sacramento and provide our state agencies who have provided comments on Yucca Mountain with an overview of the LBNL studies and he said that what was presented in the EIS for Yucca Mt. was only a small part of it. Would you be interested in having him come to Sacramento to brief our Yucca Mountain Technical Working Group?
